PUBLIC NOTICE

PEMBERTON NORTH WATER SYSTEM HYDRANT FLUSHING

**Thursday, May 5, 2016
and
Friday, May 6, 2016**

9:00 AM to 4:00 PM

DISRUPTIONS TO WATER SERVICE ARE MINIMAL

Flushing can improve water quality by reducing the sediment that comes from the inside of the pipes and flushing will decrease the rate of bacterial growth. It can also improve taste, odour & colour. Our aim is to run the water until it is completely clear, but you may experience some of the following in a very limited capacity:

- Water pressure may be temporarily reduced.
- You may experience temporary discoloration of water. If so, run water up to five to ten minutes - this should clear it up.
- Refrain from using a washing machine during this time.

If you have any questions or required additional information please contact the SLRD, Utilities & Environmental Services department at 604-894-6371.
