LILLOOET LANDFILL ASBESTOS DECLARATION AND ACKNOWLEDGEMENT FORM

****This form is required to protect workers from the risk of asbestos exposure as per the BC Workers Compensation Act****

Last Name/First Name	
Company Name (if applicable)/ Address	Phone
Address of Waste Material (if different from above)	
Email	Disposal Facility
Delivery Start Date (preferred)	Delivery End Date (preferred)
Estimated tonnes or volume	MOE Transport Manifest Number
Material Description (does the material contain asbestos, what type of asbestos, containment type (bags/drums), etc.)	

DIRECTIONS

This form must be completed and signed prior to disposing of any of the following Potential Asbestos Containing Materials (PACM). PACM are those materials that may contain asbestos which are commonly found in commercial and residential buildings.

- Gypsum wall board (drywall), wall tape, and drywall mud compound
- Plaster and plaster board
- Vinyl flooring and leveling compound
- Ceiling tiles
- Cement pipe
- Stucco and cement siding
- Spray applied insulation and attic insulation

Please check the box that describes your load(s) and follow all disposal instructions.

Please note pre-approval from the SLRD main office may be required prior to disposal.

1. New Construction

New construction materials consisting of unfinished cuts of gypsum or other construction related debris from new construction.

Disposal instructions:

- Signed declaration form required
- No pre-approval from the SLRD or appointment required
- New construction waste is assumed to not contain asbestos due to the waste materials being leftover/cut-off of new construction material
- Materials may be disposed of normally in accordance to SLRD's Lillooet Landfill Fees Bylaw No. 1297-2013
- SLRD disposal fees will apply

2. Post 1990 Construction

This category applies to PACM where the origin, age, and content of the material is known to have been installed after December 31, 1989. It is widely accepted that construction materials manufactured after this date do not contain asbestos.

Disposal instructions:

- Signed declaration form required
- Proof of Post 1990 Construction (e.g., building permit) required
- No pre-approval from the SLRD or appointment required
- Materials may be disposed of normally in accordance to SLRD's Lillooet Landfill Fees Bylaw No. 1297-2013
- SLRD disposal fees will apply

3. PRE 1990, TESTED & CONFIRMED TO NOT CONTAIN ASBESTOS

This category applies to PACM originating from buildings where a hazard assessment has been completed and lab results have confirmed the waste materials do NOT contain asbestos.

Disposal instructions:

- Signed declaration form required
- Hazard assessment including lab results required
- Pre-approval from the SLRD required
- Appointment not required
- Completed forms must be submitted 10 days prior to disposal
- Materials may be disposed of normally in accordance to SLRD's Lillooet Landfill Fees Bylaw No. 1297-2013
- SLRD disposal fees will apply

4. ASBESTOS CONTAINING MATERIAL (ACM)

This category applies to disposal of ACM originating from buildings where a hazard assessment has been completed by a qualified professional and the material has been tested and confirmed to be asbestos containing material (ACM).

Disposal instructions:

- Signed declaration form required
- Hazard assessment including lab results required
- Pre-approval from the SLRD required
- Appointment required
- Completed forms and appointment request must be submitted 10 days prior to disposal
- Materials must be double-bagged, sealed and labelled in 6 mm thick plastic bags (0.006 inches) before arriving at the disposal facility
- SLRD disposal fees will apply

PLEASE READ CAREFULLY

By completing and signing this form, you:

- Understand and agree that asbestos is a hazardous material found in many construction materials installed pre-1990 (examples include Gypsum wall board (drywall), wall tape, and drywall mud compound, plaster and plaster board, vinyl floor tile and leveling compound, ceiling tiles, cement pipe, stucco and cement siding, spray applied insulation and attic insulation) that if handled or processed improperly poses a serious health risk to workers and the public exposed to asbestos-contaminated air;
- Affirm that you have made a truthful declaration about the origin, age and content of the material you are delivering and dumping at this facility;
- Agree to adhere to all disposal instructions (both written and verbal), and you may be subject to an offence and penalties outlined in the Lillooet Landfill Fees Bylaw No. 1297-2013 if you do not follow disposal instruction;
- Understand that the SLRD may conduct samples of waste materials to ensure you have made a truthful declaration. If it is found you have made an incorrect or untruthful declaration you will be liable for all costs associated with the clean-up, remediation, and proper disposal of the waste materials. This may include but is not limited to the costs of emergency hazardous waste clean-up that could result from a positive asbestos sample in a load that is not double bagged and sealed in 6 mil bags; and
- Certify that the asbestos containing material will be handled and delivered to the disposal facility in accordance with the [Management of Asbestos Section in the BC Hazardous Waste Regulation](#).

Customer Signature	Date/time
--------------------	-----------

SLRD APPROVAL

THIS SECTION MUST BE COMPLETED PRIOR TO DISPOSAL OF ACM:

Was a hazard assessment completed (including testing for asbestos)? Y/N	If yes, was asbestos found? Y/N
Receiving facility (disposal location)	
Additional Disposal Instructions	
SLRD Representative (Print Name)	SLRD Authorization (Signature)
