

Make Soil, Not Waste

Backyard Composting

Food scraps that end up in landfills cannot be re-used to grow food.

Composting is an easy way to reduce your household's methane emissions.

Did you know? In 2020 a waste audit revealed that 30.5% of the waste being sent to the Lillooet Landfill was compostable.

How to collect organics?

- Pick a kitchen container and an outdoor composter that works for you and your family while considering wildlife.
- Backyard composting in bear country resources are available at slrd.bc.ca/makesoilnotwaste.
- Let's keep wildlife wild and communities safe; wildsafebc.com.

Examples of material to separate:

Packaging

*Recycle

Stickers

*Garbage

Elastics

*Re-use

Kitchen Catcher & Green Bin Tips

Line it

Line your countertop container with newspaper to prevent food from sticking to the bottom.

Wrap it

Use a piece of newspaper to cover your work area. When finished, wrap it all up and drop it in the bin.

Rinse it

Rinse your kitchen catcher and green bin every time you empty them. Let dry before using. Check if your container is dishwasher friendly! If smell persists, sprinkle baking soda.
